Removed Any Papers Not
Studying Color and
Aggression
N = 324

Articles assessed for inclusion criteria
N = 230

Assessment

Papers were Removed if
they did not include:

- Natural pigment
variation within the
same species
- Individual measure of
both color and
aggression against a
con-specific (same age,
pigment, and sex)
- Report relevant
statistics
- Analyze data in
comparison between
color morphs
